PROFESSIONAL SUMMARY

Frontend Engineer with 3+ years of experience building responsive, scalable, and accessible web applications using **React**, **JavaScript/TypeScript**, **HTML5**, and **CSS3**. Proven expertise in agile environments, front-end architecture, and full-stack development with strong foundations in computer science, data structures, and algorithmic problem-solving. Delivered high-performance consumer-facing UIs and internal tools in cloud-native ecosystems, and actively contributed to CI/CD, testing, and deployment pipelines. Passionate about delivering clean, performant, and user-centered interfaces.

Education

M.S. Computer Science

Case Western Reserve University, Cleveland, OH

Expected May 2025

Technical Skills

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL, C#, Python
- **Frontend:** React, Angular, Redux, Bootstrap, Material UI, Tailwind
- **Backend:** Node.js, .NET Core, ASP.NET, Express.js
- **Testing:** Jest, Playwright, Selenium, xUnit
- **DevOps & Tools:** Git, GitHub Actions, Azure DevOps, Webpack, Docker, Figma
- **Cloud & APIs:** Azure (Functions, Blob, Cosmos DB), REST, Supabase, Firebase
- **Methodologies:** Agile (Scrum), CI/CD, MVC, Component-Based Architecture

Professional Experience

Frontend Engineer & CTO | Hilde B Foundation

Denver, CO | May 2025 – Present

- Led the design and development of responsive UI components using **React**, TypeScript, and Tailwind for donor and HR platforms.
- Refactored legacy components to modular React components, improving load speed by 42%.
- Owned all front-end support tickets, triaging UI bugs and delivering hotfixes with Git branching strategies.
- Collaborated across engineering and design teams to implement mobile-first and accessible web interfaces.

Software Engineer Intern | Tharro Labs Inc.

Remote | Apr 2025 – May 2025

- Built two cross-platform mobile apps using React Native with component-based UI and REST APIs.
- Integrated chat, authentication, and real-time supervision dashboards using Node.js and Supabase.
- Conducted accessibility reviews to meet WCAG 2.1 AA compliance.
- Optimized bundle sizes and lazy-loaded assets using React Suspense and Webpack.

Web Developer Intern | Waverly Partners

Remote | Apr 2025 – May 2025

- Developed a resume-job match portal using Angular and React with modular TypeScript services.
- Enhanced site performance by implementing SSR and preloading strategies.
- Maintained clean UI design through reusable CSS utilities and global theming.
- Collaborated with design and engineering to align on web guidelines and content models.

Frontend Developer | Summer on the Cuyahoga (SOTC)

Cleveland, OH | Dec 2024 – May 2025

- Migrated marketing website to HubSpot CMS, redesigning components with HTML/CSS, and JavaScript.
- Refactored SEO-critical pages to meet Lighthouse and Core Web Vitals standards.
- Conducted regression testing using Selenium and automated end-to-end flows.

Research Assistant | Case Western Reserve University

Cleveland, OH | Jul 2024 – Jan 2025

- Created a front-end dashboard using **React** and **MongoDB** for privacy-compliant federated data access.
- Implemented secure forms, tables, and user interfaces using Redux, Hooks, and React Router.
- Participated in weekly Agile sprint reviews and release planning.

Teaching Assistant | Case Western Reserve University

Cleveland, OH | Jul 2024 – Jan 2025

- Assisted graduate students in web development and network system design.
- Supported debugging assignments involving React, JavaScript, and APIs.

Software Engineer | HCL Technologies

Hyderabad, India | Jul 2022 – Dec 2023

- Developed React-based dashboards for real-time analytics and reporting in .NET backends.
- Used Redux for state management and React Router for seamless navigation.
- Built internal component libraries for reusable UI elements and ensured cross-browser compatibility.
- Reviewed peer code, participated in standups, and shipped features biweekly.

Projects

Document Management System (Inspired by DocVue)

React.js, TypeScript, .NET Core, SQL Server, Figma

- Created AI-powered routing system for department-specific document distribution.
- Designed and prototyped approval flows using Figma and built full-stack functionality.
- Integrated secure admin feedback loops and re-review triggers.
- Automated document lifecycle, improving organizational efficiency by 40%.

Resume Chatbot & Analytics Platform

Azure OpenAI, LangChain, Streamlit, Python, Blob Storage

- Designed interface for resume-based chatbot using OpenAI GPT and LangChain.
- Built a responsive chat UI and backend for PDF-based resume analysis.
- Provided actionable insights to job seekers with UX-friendly summaries.
- Deployed app to Azure and integrated usage tracking dashboard.

University Class Automation System

Selenium, C#, Excel, Windows Scheduler

- Developed system to scrape and analyze class availability using browser automation.
- Designed alerting UI and scheduled jobs for daily class seat monitoring.
- Streamlined process for students, saving manual checks and emails.
- Delivered full documentation for setup and scheduling via Windows Task Manager.

Real-Time Chat App

ASP.NET Core, SignalR, React.js, WebSockets

- Designed real-time messaging UI using Figma and implemented with SignalR.
- Handled 1000+ concurrent sessions with minimal latency.
- Developed secure auth flows and dynamic user threads.
- Integrated emoji/sticker support and message history tracking.

Certifications

- **JavaScript Algorithms and Data Structures – freeCodeCamp**
- **Responsive Web Design Certification – freeCodeCamp**
- **C# Certification – Microsoft**
- **Postman Student Expert – API Automation**
- **Docker for Developers – LinkedIn Learning**
